

Wedge 2170 · 3000 s Run · Simulation vs Experimental

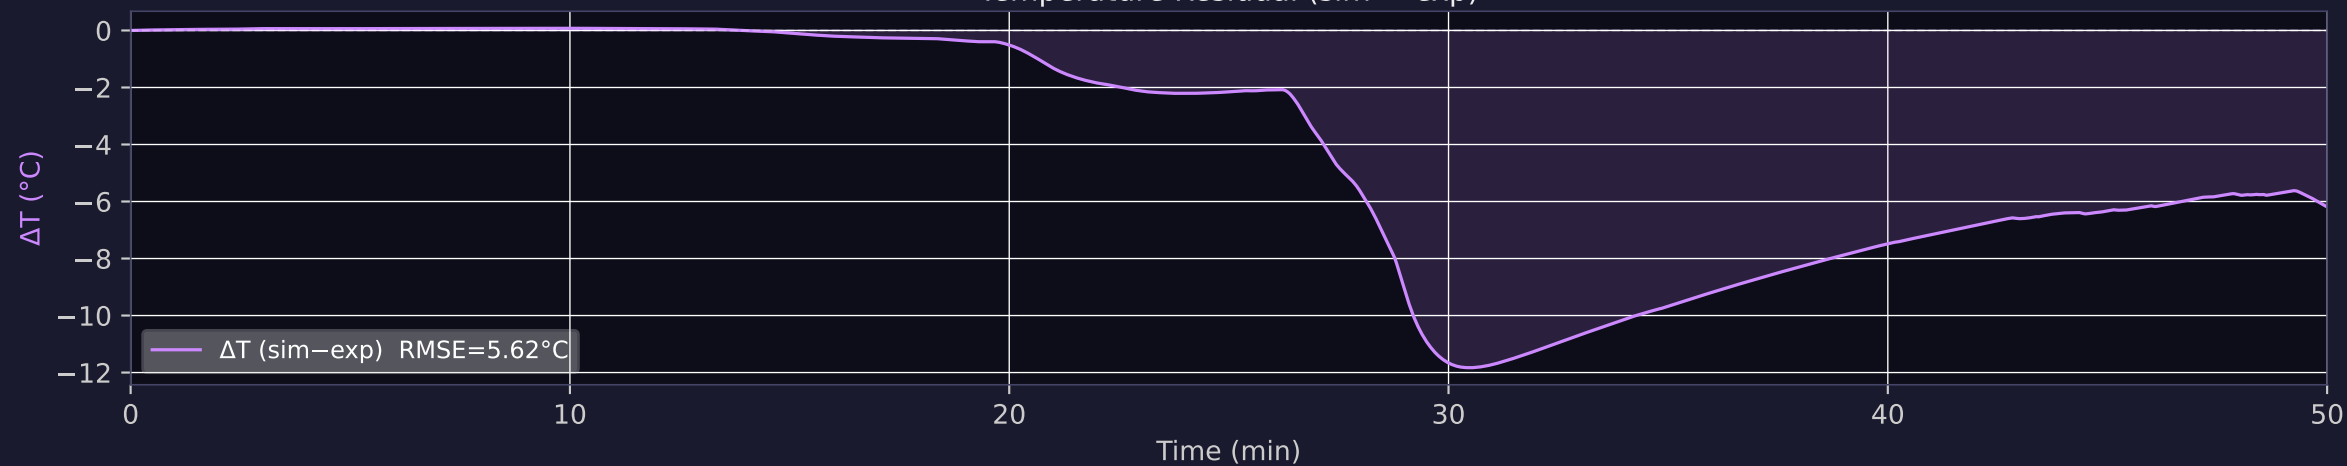

Jelly-Roll Temperature — Simulation vs Experimental

Applied Heat — Simulation vs Experimental

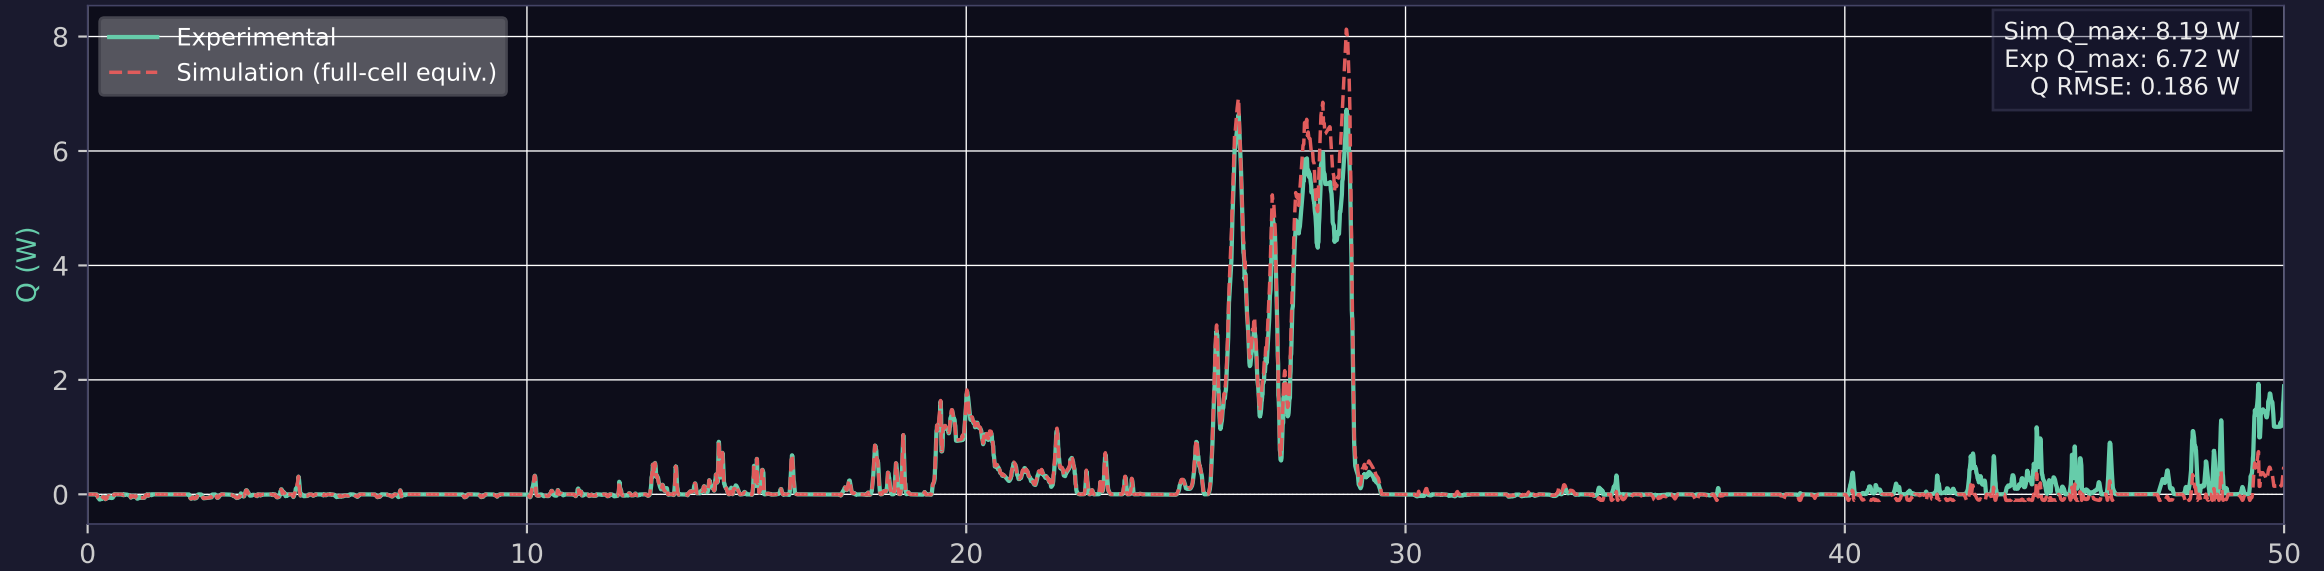

Temperature Residual (sim – exp)

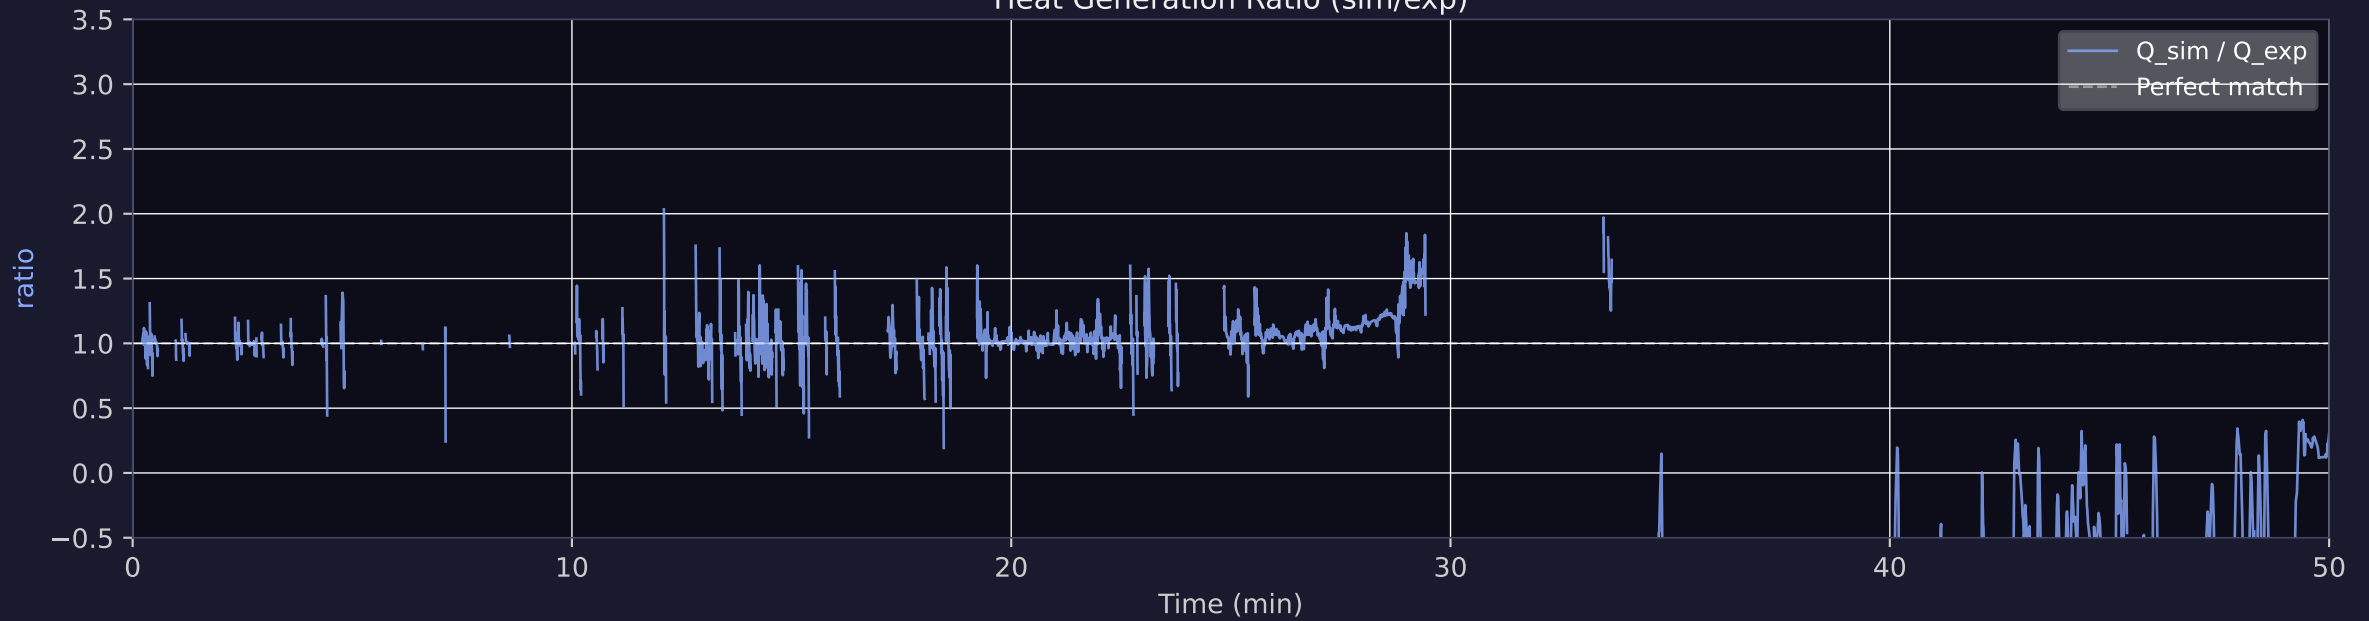

Wedge 2170 · Heat Generation Analysis

Heat Generation 0-3000 s

Heat Generation Ratio (sim/exp)

Summary — 3000 s Run			
Metric	Simulation	Experimental	Δ (sim-exp)
T_max (°C)	30.039	38.072	-8.033
T_mean (°C)	25.300	29.096	-3.796
T RMSE (°C)	—	—	5.624
Q_max (W)	8.188	6.721	1.467
Q_mean (W)	0.3402	0.2130	0.1272
Q RMSE (W)	—	—	0.186
Observation	Bursts fast, cools fast ($\tau \approx 26$ s)	Slow build-up ($\tau \gg 26$ s)	k_r too high in sim
